HOBBIES

OBJECTIVE
- Trained fresher aspiring to join a leading company that aligns with my skills. Self-motivated graduate seeking an entry-level position in the software department. Eager to apply my knowledge and contribute effectively.

CERTIFICATIONS
- Developer Job Simulatrion internship by Accenture.
- Software Engineering internship by J.P. Morgan Chase & Co.
- Advanced Software Engineering internship by Walmart.
- Software Engineering internship by Goldman Sachs's.

PROJECTS
Portfolio◥
- I have created a website to showcase my projects and skills. It is responsive and interactive website which is done by using HTML,CSS and JavaScript.

Calendar◥
- Calendar reminder systems with customizable features,enable users to effortlessly mark dates for reminders or tasks. Easy updating and deletion functionalities meet user preferences, ensuring timely reminders and efficient task management.

Church Management System◥
- Designed with FIGMA, featuring membership management, donation tracking, event calendar, communication tools, volunteer coordination, child check-in, small group management, and reporting analytics.

NR-AGENCIES◥   Figma◥
- UI & UX development for The NR-AGENCIES by using Figma & React JS, It aims to create an all-encompassing AC repair and services. AC Service app provides a convenient platform for booking a range of air conditioning services, including installation, repair, maintenance, and gas refilling, for split and window units. Available on iOS and Android, the app offers easy scheduling, transparent pricing, and access to vetted, skilled technicians, ensuring high-quality service.
